

Figure 1: Overview Map for Wetland Resources Relating to 11 San Souci Drive

The BVW wetland on #11 San Souci Drive borders on an intermittent stream along the eastern property boundary and to a stream/swale located over 900 feet to the southwest of #11. The blue arrows show the direction of flow in the intermittent stream with the source of water beginning to the south of Sunrise Circle before being conveyed under the roadway before discharging to #11.
